**iAlpha**

**AA106-86**

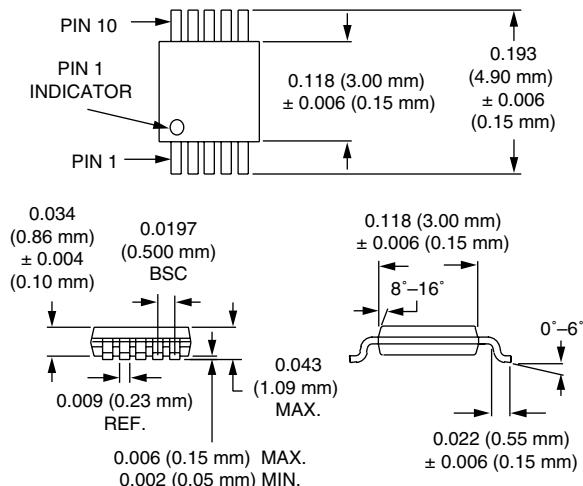

## Features

- Attenuation 0.5 dB Steps to 15.5 dB with High Accuracy
- Single Positive Control (+3 to +5 V) for Each Bit
- Low DC Power Consumption
- Miniature Low Cost MSOP-10 Plastic Package

## Description

The AA106-86 is a 5 bit, single positive control GaAs IC FET digital attenuator in a low cost MSOP-10 package. This attenuator has an LSB of 0.5 dB and a total attenuation of 15.5 dB. The attenuator requires external DC blocking capacitors, positive supply voltage ( $V_S$ ) and five individual bit control voltages ( $V_1$ – $V_5$ ). The AA106-86 is particularly suited where high attenuation accuracy, low insertion loss and low intermodulation products are required. Typical applications include cellular radio, wireless data, and wireless local loop gain level control circuits.
