## Product Preview

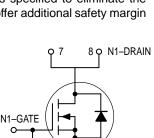

# Medium Power Surface Mount Products **TMOS Dual N-Channel**

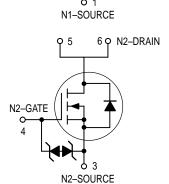

**Field Effect Transistors** 

WaveFET™ devices are an advanced series of power MOSFETs which utilize Motorola's latest MOSFET technology process to achieve the lowest possible on–resistance per silicon area. They are capable of withstanding high energy in the avalanche and commutation modes and the drain–to–source diode has a very low reverse recovery time. WaveFET™ devices are designed for use in low voltage, high speed switching applications where power efficiency is important. Typical applications are dc–dc converters, and power management in portable and battery powered products such as computers, printers, cellular and cordless phones. They can also be used for low voltage motor controls in mass storage products such as disk drives and tape drives. The avalanche energy is specified to eliminate the guesswork in designs where inductive loads are switched and offer additional safety margin against unexpected voltage transients.

- Zener Protected Gates Provide Electrostatic Discharge Protection
- Designed to withstand 200 V Machine Model and 2000 V Human Body Model
- Low R<sub>DS(on)</sub> Provides Higher Efficiency and Extends Battery Life
- Logic Level Gate Drive Can Be Driven by Logic ICs
- Miniature SO–8 Surface Mount Package Saves Board Space
- Diode Is Characterized for Use In Bridge Circuits
- Diode Exhibits High Speed, With Soft Recovery
- IDSS Specified at Elevated Temperature
- Mounting Information for SO–8 Package Provided

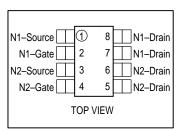

### **MMDF3200Z**

Motorola Preferred Device

DUAL TMOS
POWER MOSFET
11.5 AMPERES
20 VOLTS
RDS(on) = 0.02 OHM

### **MAXIMUM RATINGS** (T<sub>.J</sub> = 25°C unless otherwise noted)

| Rating   | Symbol               | Max         | Unit |
|--|----------------------|-------------|------|
| Drain-to-Source Voltage                                  | V <sub>DSS</sub>     | 20          | V    |
| Drain–to–Gate Voltage ( $R_{GS} = 1.0 \text{ M}\Omega$ ) | VDGR                 | 20          | V    |
| Gate-to-Source Voltage — Continuous                      | VGS                  | ± 12        | V    |
| Operating and Storage Temperature Range                  | TJ, T <sub>stg</sub> | - 55 to 150 | °C   |

### **DEVICE MARKING**

### ORDERING INFORMATION

| D3200 | Device Device |     | Tape Width          | Quantity   |
|-------|---------------|-----|---------------------|------------|
| D3200 | MMDF3200Z     | 13″ | 12 mm embossed tape | 4000 units |

Pulse Test: Pulse Width ≤ 300 μs, Duty Cycle ≤ 2%.
 Switching characteristics are independent of operating junction temperature.

### PACKAGE DIMENSIONS

- DIMENSIONING AND TOLERANCING PER ASME
- Y14.5M, 1994. DIMENSIONS ARE IN MILLIMETER.
- DIMENSION D AND E DO NOT INCLUDE MOLD PROTRUSION.
- MAXIMUM MOLD PROTRUSION 0.15 PER SIDE.
  DIMENSION B DOES NOT INCLUDE DAMBAR
- PROTRUSION. ALLOWABLE DAMBAR PROTRUSION SHALL BE 0.127 TOTAL IN EXCESS OF THE B DIMENSION AT MAXIMUM MATERIAL CONDITION.
