0.6mm Pitch Board-to-Fine-Coaxial Cable Connectors

DF21 Series

Features

1.High Interconnection Reliability

Effective contact mating length of 1.55 mm, innovative bellow style contact design, built-in interlocking feature of mated connectors assures high electrical and mechanical reliability, providing needed rigidity to resist excessive twisting.

Superior reliability of the termination of the fine coaxial cable is accomplished with batch soldering.

2. Shielded design

Metal shell encloses the connector and makes contact with all external conductors of the fine coaxial cable permitting reliable ground connection to the board side of mated assemblies.

3. Reliable mating/unmating

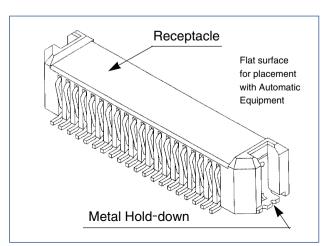

The connectors are self-align during mating. Optional pull-out tab permits connection and disconnection in narrow spaces. Polarized configuration prevents incorrect mating.

4. Board placement with Automatic Equipment.

The upper surface provides flat area for placement of embossed tape packaged connectors with vacuum nozzles of automatic equipment.

Applications

Notebook computers, liquid crystal displays (LCD), video and audio devices, medical instruments, portable devices and any other device requiring reliable connection and termination with fine pitch coaxial cable.
