

AN5764N

Horizontal picture position control IC for CRT monitor

■ Overview

The AN5764N is an IC for CRT monitor horizontal picture position control. The picture position can be controlled by DC voltage, and the adoption of fin-attached SIL 7-pin package contributes to the rationalization of monitor set.

■ Features

- CRT monitor position control
- Built-in low voltage output circuit
- Built-in DC control circuit

■ Applications

- CRT monitor

■ Block Diagram

■ Pin Descriptions

Pin No.	Description
1	V_{CC}
2	Constant voltage output (3 V)
3	Control input
4	GND
5	Out1 (Positive output)
6	N.C.
7	Out2 (Negative output)

Note) The fin is at the same potential as GND.

■ Absolute Maximum Ratings

Parameter	Symbol	Rating	Unit
Supply voltage	V_{CC}	8.0	V
Supply current	I_{CC}	500	mA
Power dissipation *2	P_D	1 400	mW
Operating ambient temperature *1	T_{opr}	-20 to +75	°C
Storage temperature *1	T_{stg}	-55 to +150	°C

Note) *1: Except for the operating ambient temperature and storage temperature, all ratings are for $T_a = 25^\circ\text{C}$.

*2: The power dissipation shown is for the independent IC without a heat sink at $T_a = 75^\circ\text{C}$. (Refer to "■ Application Note".)

■ Recommended Operating Range

Parameter	Symbol	Range	Unit
Supply voltage	$V_{CC1,2}$	5 to 7	V
Control input	V_{3-4}	0 to V_2	V
Out1 output maximum output current	I_{5max}	-400 to +400	mA
Out2 output maximum output current	I_{7max}	-400 to +400	mA
Constant voltage maximum output current	I_{2max}	-2.0 to +0.02	mA

Note) For the circuit currents, '+' denotes current flowing into the IC, and '-' denotes current flowing out of the IC.

■ Electrical Characteristics at $T_a = 25^\circ\text{C}$

Parameter	Symbol	Conditions	Min	Typ	Max	Unit
Circuit current pin 1	I_{CC1}	$V_{CC} = 5.5\text{ V}$, $V_3 = 1.5\text{ V}$ At load (R_L) = Open	7	14	28	mA
Circuit voltage pin 2	V_{2-4}	$V_{CC} = 5.5\text{ V}$, $V_3 = 1.5\text{ V}$ At load (R_L) = Open	2.8	3.0	3.2	mV
Circuit voltage pin 5	V_{5-4}	$V_{CC} = 5.5\text{ V}$, $V_3 = 1.5\text{ V}$ At load (R_L) = Open	2.3	2.6	2.9	V
Circuit voltage pin 7	V_{7-4}	$V_{CC} = 5.5\text{ V}$, $V_3 = 1.5\text{ V}$ At load (R_L) = Open	2.3	2.6	2.9	V
Circuit voltage pin 5-7	V_{5-7}	$V_{CC} = 5.5\text{ V}$, $V_3 = 1.5\text{ V}$ At load (R_L) = Open	-0.35	0.0	0.35	V
Out1 high-level output voltage	V_{5HI}	$V_{CC} = 5.5\text{ V}$, $V_3 = 3\text{ V}$ At $R_L = 7.5\ \Omega$ connection	4.2	4.5	4.7	V
Out1 low-level output voltage	V_{5LOW}	$V_{CC} = 5.5\text{ V}$, $V_3 = 0\text{ V}$ At $R_L = 7.5\ \Omega$ connection	1.3	1.8	2.3	V
Out2 high-level output voltage	V_{7HI}	$V_{CC} = 5.5\text{ V}$, $V_3 = 0\text{ V}$ At $R_L = 7.5\ \Omega$ connection	4.3	4.5	4.7	V
Out2 low-level output voltage	V_{7LOW}	$V_{CC} = 5.5\text{ V}$, $V_3 = 3\text{ V}$ At $R_L = 7.5\ \Omega$ connection	1.3	1.8	2.3	V
Output voltage difference min.	V_{5-7min}	$V_{CC} = 5.5\text{ V}$, $V_3 = 0\text{ V}$ At $R_L = 7.5\ \Omega$ connection	-3.2	-2.5	-2.2	V

■ Electrical Characteristics at $T_a = 25^\circ\text{C}$ (continued)

Parameter	Symbol	Conditions	Min	Typ	Max	Unit
Output voltage difference typ.	$V_{5-7\text{typ}}$	$V_{CC} = 5.5\text{ V}$, $V_3 = 1.5\text{ V}$ At $R_L = 7.5\ \Omega$ connection	-0.4	0.0	0.4	V
Output voltage difference max.	$V_{5-7\text{max}}$	$V_{CC} = 5.5\text{ V}$, $V_3 = 3\text{ V}$ At $R_L = 7.5\ \Omega$ connection	2.2	2.5	3.2	V

• Design reference data

Note) The characteristics listed below are theoretical values based on the IC design and are not guaranteed.

Parameter	Symbol	Conditions	Min	Typ	Max	Unit
Control input pin circuit current max.	$I_{3\text{min}}$	Current of pin 3, at $V_{CC} = 5.5\text{ V}$, $V_4 = 0\text{ V}$	-100	-10	0	μA
Control input pin circuit current typ.	$I_{3\text{max}}$	Current of pin 3, at $V_4 = 0.5\text{ V}$ to 3 V	-50	-5	0	μA
Out1 maximum output current (Positive)	$I_{5\text{max}}$	Output current of pin 5, at $V_{CC} = 5.5\text{ V}$	300	—	400	mA
Out1 maximum output current (Negative)	$I_{5\text{min}}$	Output current of pin 5, at $V_{CC} = 5.5\text{ V}$	-400	—	-300	mA
Out2 maximum output current (Positive)	$I_{7\text{max}}$	Output current of pin 7, at $V_{CC} = 5.5\text{ V}$	300	—	400	mA
Out2 maximum output current (Negative)	$I_{7\text{min}}$	Output current of pin 7, at $V_{CC} = 5.5\text{ V}$	-400	—	-300	mA

■ Terminal Equivalent Circuits

Pin No.	Equivalent circuit	Description
1		<p>V_{CC}: Power supply pin</p> <p>DC 5.5 V (typ.) application</p>
2		<p>Constant voltage output: 3 V constant-voltage output</p> <p>DC 3 V</p>
3		<p>Control input: Input pin for control</p> <p>Output voltage balances at ($V_3 = \frac{1}{2} V_2$)</p> <p>0 V to 3 V variable</p>

■ Terminal Equivalent Circuits (continued)

Pin No.	Equivalent circuit	Description
4		GND: GND (Earth) pin Fin becomes the same potential, too. 0 V
5		Out1 output: Output pin Outputs the same polarity as pin 3 control voltage DC 1.2 V to 4.3 V
6		N.C.: N.C. pin
7		Out2 output: Output pin Outputs the reverse polarity of pin 3 control voltage. DC 1.2 V to 4.3 V

■ Application Circuit Examples

■ Application Note

- $P_D - T_a$ curve of HSIP007-P-0000

Request for your special attention and precautions in using the technical information and semiconductors described in this material

- (1) An export permit needs to be obtained from the competent authorities of the Japanese Government if any of the products or technologies described in this material and controlled under the "Foreign Exchange and Foreign Trade Law" is to be exported or taken out of Japan.
- (2) The technical information described in this material is limited to showing representative characteristics and applied circuit examples of the products. It does not constitute the warranting of industrial property, the granting of relative rights, or the granting of any license.
- (3) The products described in this material are intended to be used for standard applications or general electronic equipment (such as office equipment, communications equipment, measuring instruments and household appliances).
Consult our sales staff in advance for information on the following applications:
 - Special applications (such as for airplanes, aerospace, automobiles, traffic control equipment, combustion equipment, life support systems and safety devices) in which exceptional quality and reliability are required, or if the failure or malfunction of the products may directly jeopardize life or harm the human body.
 - Any applications other than the standard applications intended.
- (4) The products and product specifications described in this material are subject to change without notice for reasons of modification and/or improvement. At the final stage of your design, purchasing, or use of the products, therefore, ask for the most up-to-date Product Standards in advance to make sure that the latest specifications satisfy your requirements.
- (5) When designing your equipment, comply with the guaranteed values, in particular those of maximum rating, the range of operating power supply voltage and heat radiation characteristics. Otherwise, we will not be liable for any defect which may arise later in your equipment.
Even when the products are used within the guaranteed values, redundant design is recommended, so that such equipment may not violate relevant laws or regulations because of the function of our products.
- (6) When using products for which dry packing is required, observe the conditions (including shelf life and after-unpacking standby time) agreed upon when specification sheets are individually exchanged.
- (7) No part of this material may be reprinted or reproduced by any means without written permission from our company.

Please read the following notes before using the datasheets

- A. These materials are intended as a reference to assist customers with the selection of Panasonic semiconductor products best suited to their applications.
Due to modification or other reasons, any information contained in this material, such as available product types, technical data, and so on, is subject to change without notice.
Customers are advised to contact our semiconductor sales office and obtain the latest information before starting precise technical research and/or purchasing activities.
- B. Panasonic is endeavoring to continually improve the quality and reliability of these materials but there is always the possibility that further rectifications will be required in the future. Therefore, Panasonic will not assume any liability for any damages arising from any errors etc. that may appear in this material.
- C. These materials are solely intended for a customer's individual use.
Therefore, without the prior written approval of Panasonic, any other use such as reproducing, selling, or distributing this material to a third party, via the Internet or in any other way, is prohibited.
