

- Designed Specifically for High Frequency Electronic Ballasts up to 125 W
- h_{FE} 6 to 22 at $V_{CE} = 1\text{ V}$, $I_C = 2\text{ A}$
- Low Power Losses (On-state and Switching)
- Key Parameters Characterised at High Temperature
- Tight and Reproducible Parametric Distributions

MECHANICAL DATA

TO-220

3-pin plastic flange-mount package

This single-in-line package consists of a circuit mounted on a lead frame and encapsulated within a plastic compound. The compound will withstand soldering temperature with no deformation, and circuit performance characteristics will remain stable when operated in high humidity conditions. Leads require no additional cleaning or processing when used in soldered assembly.

NOTES: A. The centre pin is in electrical contact with the mounting tab.
 B. Mounting tab corner profile according to package version.
 C. Typical fixing hole centre stand off height according to package version.
 Version 1, 18.0 mm. Version 2, 17.6 mm.
