AOD4112

N-Channel Enhancement Mode Field Effect Transistor

SRFET™

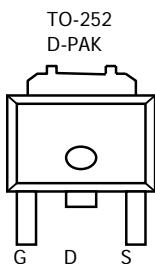

General Description

SRFETTM The AOD4112 uses advanced trench technology with a monolithically integrated Schottky diode to provide excellent $R_{DS(ON)}$, and low gate charge. This device is suitable for use as a low side FET in SMPS, load switching and general purpose applications. Standard Product AOD4112 is Pb-free (meets ROHS & Sony 259 specifications).

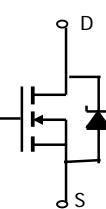

Features

$V_{DS} (V) = 30V$
 $I_D = 20A (V_{GS} = 10V)$
 $R_{DS(ON)} < 9.5m\Omega (V_{GS} = 10V)$
 $R_{DS(ON)} < 14.5m\Omega (V_{GS} = 4.5V)$

UIS Tested!
 $R_g, C_{iss}, C_{oss}, C_{rss}$ Tested!

A. The value of R_{QJA} is measured with the device mounted on 1in 2 FR-4 board with 2oz. Copper, in a still air environment with $T_A=25^\circ\text{C}$. The Power dissipation P_{DSM} is based on $t<10\text{s}$ R_{QJA} and the maximum allowed junction temperature of 150°C . The value in any given application depends on the user's specific board design, and the maximum temperature of 175°C may be used if the PCB allows it.

B. The power dissipation P_D is based on $T_{J(\text{MAX})}=175^\circ\text{C}$, using junction-to-case thermal resistance, and is more useful in setting the upper dissipation limit for cases where additional heatsinking is used.

C. Repetitive rating, pulse width limited by junction temperature $T_{J(\text{MAX})}=175^\circ\text{C}$.

D. The R_{QJA} is the sum of the thermal impedance from junction to case R_{QJC} and case to ambient.

E. The static characteristics in Figures 1 to 6 are obtained using $<300\text{ }\mu\text{s}$ pulses, duty cycle 0.5% max.

F. These curves are based on the junction-to-case thermal impedance which is measured with the device mounted to a large heatsink, assuming a maximum junction temperature of $T_{J(\text{MAX})}=175^\circ\text{C}$. The SOA curve provides a single pulse rating.

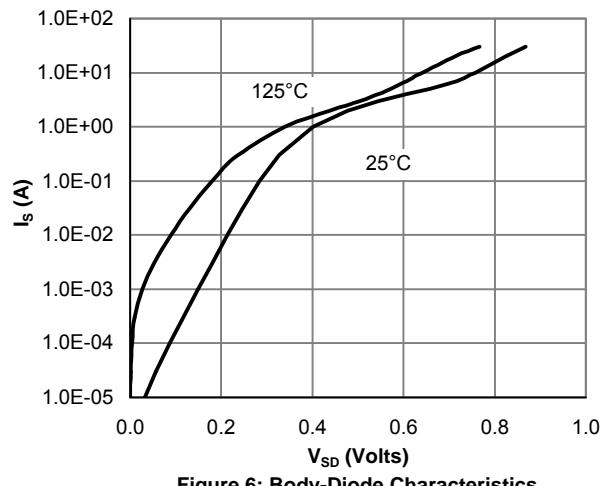

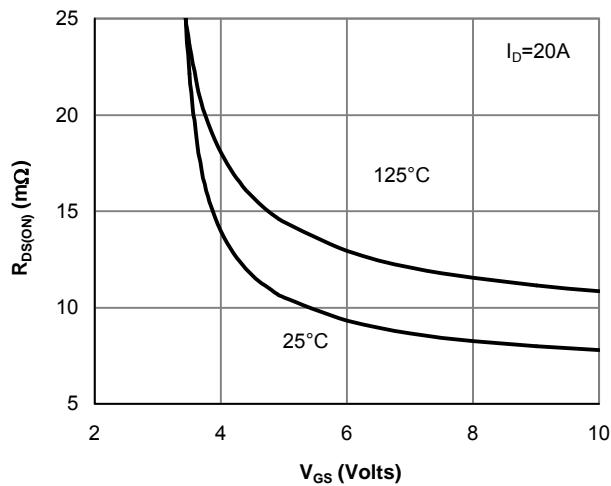

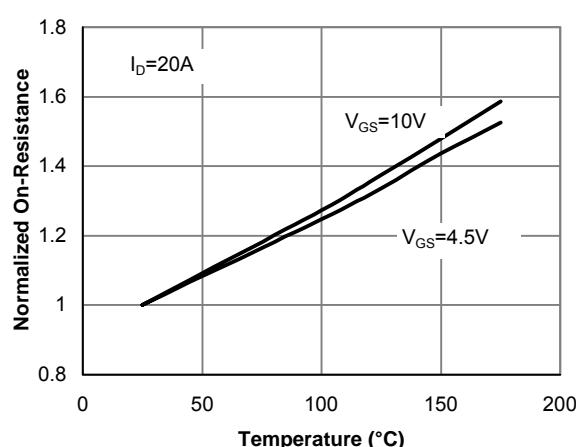

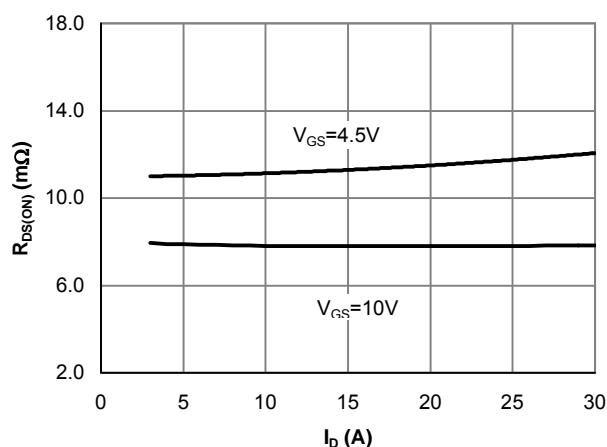

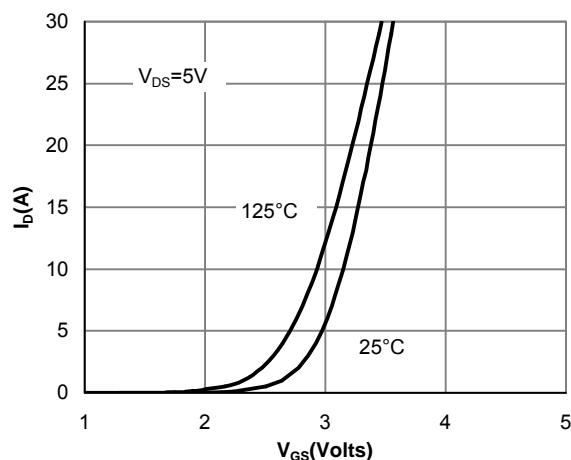

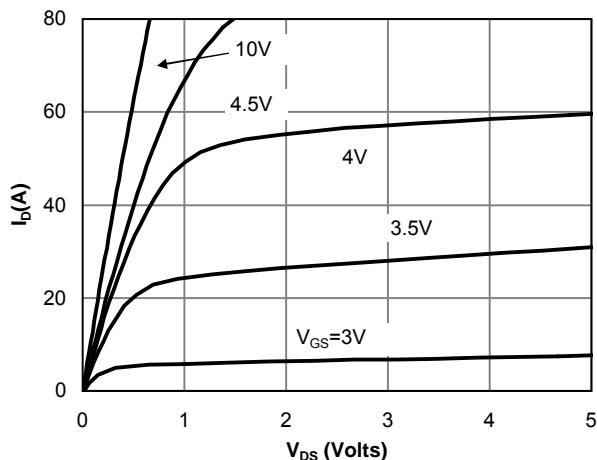

G. The maximum current rating is limited by bond-wires.

H. These tests are performed with the device mounted on 1 in 2 FR-4 board with 2oz. Copper, in a still air environment with $T_A=25^\circ\text{C}$.
