*reliable multiband,*  
*secure, air and ground*  
*communications, and*  
*50 Watt transmit power*

The RF-5800M-V is an advanced radio amplifier that provides up to 50 watts FM transmit power and 20 watts AM transmit power, with full circuit protection and DC filtering. The amplifier is used with the RF-5800M family of transceivers. It supports continual frequency coverage and all modes of operation across the 30 MHz to 512 MHz frequency range.

The system has antenna port programming and includes options for mobile and base station operations, with all required mounting, antennas systems, and associated power supplies and cables. An optional pull and go version allows for quick conversion to manpack configuration, including all manpack radio accessories and antennas. Other versions are available, which provide either a VHF/LOW (FM) filter, UHF-AM filter, or both.

When used in conjunction with the RF-5800M multi-band transceiver, the system provides voice communications in a variety of formats and channel spacing, ensuring interoperability with existing ground, air, ATC, and Land Mobile Radio systems.

Built-in data modems include a high-speed modem using FSK or ASK modulation for compatibility with many older data communication systems, which supports data rates up to 64 kbps throughput, reducing on-air time.

Electronic Counter Counter Measures (ECCM) use frequency hopping to protect communications from hostile interference. Optional systems include, Harris QUICKLOOK 1A, HAVEQUICK I/II, and Rockwell-Collins TALON™.

The Harris Citadel® ASIC chip provides high-speed 128-bit digital encryption for both voice and data traffic, with customer-unique algorithms available. Global Positioning capability displays real time position information and Time of Day synchronization via the built in GPS receiver, or use of an external device. All Falcon II radios have a full function remote control capability via the removable Keypad Display Unit. The menu-driven interface allows programming and control of 100 nets. Radio-to-radio cloning and the radio programming application assure accurate and quick radio net programming.

The RF-5800M-V and multiband transceiver are interoperable with most VHF/FM/AM and UHF/AM radios systems in use today.

## Specifications for the RF-5800M-V

\*Specifications are for the RF-5800M-V when used with the RF-5800M-MP transceiver.

### General

<b>Frequency Range</b>	30 to 512 MHz
<b>Net Presets</b>	100, fully programmable
<b>Frequency Stability</b>	$\pm 1.0 \times 10^{-6}$
<b>Channel Spacing</b>	5, 6.25, 8.33, 12.5, 25 (kHz)
<b>Emission Modes</b>	FM Analog Voice, AM Voice ASK/FSK 16 kbps CVSD Voice ASK/FSK 16 kbps Data TCM 48/64 kbps Data
<b>RF Input/Output</b>	
<b>Impedance</b>	50 ohm nominal, unbalanced
<b>Power Input</b>	26 VDC (22 to 32 VDC)
<b>Data Interface</b>	Synchronous or asynchronous 75 bps – 115 kbps (RS-232C; MIL-188-114A; RS-422)
<b>Dimensions</b>	15W x 9.90H x 13.98D inch
<b>System Weight</b>	60 lb

### Receiver

<b>Sensitivity: FM</b>	-116 dBm minimum for 10 dB SINAD (LNA on) -110 dBm minimum for 10 dB SINAD (LNA off)
<b>AM</b>	-110 dB for 70% modulation, 10 dB SINAD (LNA on) -104 dBm for 70% modulation, 10 dB SINAD (LNA off)
<b>Audio Output</b>	12 mW at 1000 ohm to external handset or optional speaker
<b>Squelch</b>	Front panel adjustable, quieting or tone squelch selectable
<b>Image Rejection</b>	Greater than 60 dB
<b>IF Rejection</b>	Greater than 75 dB
<b>AGC</b>	Mode dependent, automatically selected

### Transmitter

<b>Maximum Power</b>	VHF LOW and VHF/HIGH (FM): 50 Watts UHF (AM): 20 Watts
<b>Audio Input</b>	2.6 mV at 150 ohm or 0 dBm at 600 ohm for full rated output

<b>Harmonic Suppression</b>	Greater than 40 dBc
<b>Local Oscillator Radiation</b>	Less than -70 dBm
<b>Spurious Outputs</b>	-50 dBc typical (Greater than 200 kHz from Fc)

### Environmental

<b>Test Method</b>	Per MIL-STD-810E
<b>Vibration</b>	Ground Tactical
<b>Immersion</b>	3 feet (1 meter)
<b>Operating Temperature</b>	-40°C to +70°C

### Additional Features

QUICKLOOK 1A frequency hopping  
Swept Tone Beacon Preset  
HAVEQUICK guard receiver  
CTCSS/CDCSS Rx/Tx tone support for LMR repeater interoperability  
Wireless radio-to-radio preset cloning  
10 channel LOS net scanning  
Detachable Keypad Display Unit  
48/64 Kbps Data  
Citadel® -Based Digital Encryption  
Internal 12-Channel GPS Receiver  
Situational awareness

### Options

<b>ECCM Modes*</b>	HAVEQUICK I/II TALON™
<b>Remote Control</b>	RF-5800R-RC501 or 511 Remote Control System
<b>RPA</b>	RF-6550V radio programming application Programming cable 10513-0740-A006
<b>Retransmission</b>	Cable 10511-0717-01
