## Description

CPC1016N is a miniature, low-voltage, low on-resistance 1-Form-A solid state relay in a 4-Pin SOP package. The relay uses optically coupled MOSFET technology to provide 1500V<sub>rms</sub> of input/output isolation. The efficient MOSFET switches and photovoltaic die use Clare's patented OptoMOS architecture. The optically-coupled output is controlled by a highly efficient GaAlAs infrared LED. The CPC1016N uses Clare's state of the art double-molded vertical construction packaging to produce a very compact solid state relay. The CPC1016N is ideal for replacing larger, less-reliable reed and electromechanical relays.
