Application:

The most compact, durable signal lights on the market, Dialight's LED visual indicators deliver at least five years of continuous, worry-free operation with a durable polycarbonate lens that is virtually vandal-proof. This combination of durability and long-life reliability significantly reduces the maintenance time and cost required of traditional signal lighting and virtually eliminates the risk of a light burning out—a serious problem that can prevent an individual in danger from getting the help they need in an emergency.

The LED visual signal lights provide an ideal solution for reliable indicator lighting for both indoor and outdoor call boxes and emergency telephone locations, or for safety showers or eye wash stations.
