

High efficiency, single-digit numeric displays

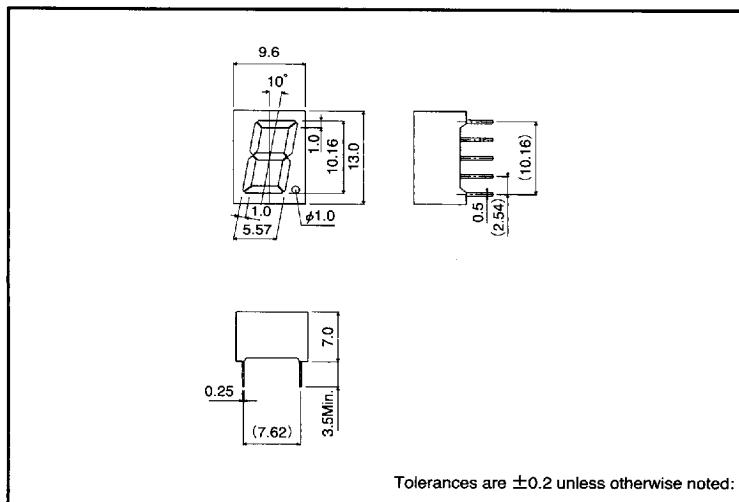

LA-401 DN Series

The LA-401 DN series were designed to meet the need for small single-digit numeric displays. These LED numeric displays use GaAsP on GaP for the emitting material (with the exception of green) and are housed in an epoxy resin package. They are single-digit displays with a character height of 10.16 mm.

●Features

- 1) Height of character : 10.16 mm.
- 2) Common anode and common cathode configurations are available for each color.
- 3) Each segment has independent pin connections and static drive is possible.
- 4) High-efficiency reflectors are used to achieve a bright, clear display.
- 5) The package surface is coated black and the segments are colored the display color.
