

3.3V Boost LVDS High-Speed Differential Line Drivers and Receivers

Product Features

- Signaling Rates >660 Mbps (330 MHz)
- Single 3.3V Power Supply Design
- Driver:
 - ±350mV Differential Swing into a 50-ohm load
 - Propagation Delay of 1.5ns Typ.
 - Low Voltage TTL (LVTTL) Inputs are 5V Tolerant
 - Driver is High Impedance when Disabled or $V_{CC} < 1.5V$
- Receiver:
 - Accepts ±50mV (min.) Differential Swing with up to 2.0V ground potential difference
 - Propagation Delay of 3.3ns Typ.
 - Low Voltage TTL (LVTTL) Outputs
 - Open, Short, and Terminated Fail Safe
- Industrial Temperature Operating Range: -40°C to 85°C
- Package Options: SOIC, TSSOP, MSOP
- Bus-Terminal ESD ≥ 12kV

Product Description

The PI90LVB179, PI90LVB180, PI90LVB050, and PI90LVB051 are differential line drivers and receivers (transceivers) that are similar to the IEEE 1596.3 SCI and ANSI/TIA/EIA-644 LVDS standards (the difference is that the driver output current is doubled). This modification enables true half-duplex operation with more than one LVDS driver or with two line transmission resistors over a 50-ohm differential transmission line. These devices use low-voltage differential signaling (LVDS) to achieve data rates in excess of 660 Mbps while being less susceptible to noise than single-ended transmission.

The drivers translate a low-voltage TTL/CMOS input into a low-voltage (350mV typical) differential output signal into a 50-ohm load. The receivers translate a differential 350mV input signal to a 3V CMOS output level. Driver section can be independently set to a power-down & high-impedance output mode with the DEN pin (active HIGH). Receiver section is controlled by the REN* pin (active LOW).

Applications

Applications include point-to-point and multidrop baseband data transmission over a controlled impedance media of approximately 50 ohms. These include intra-system connections via printed circuit board traces or cables, hubs and routers for data communications; PBXs, switches, repeaters & base stations for telecommunications and other applications such as digital cameras, printers and copiers.
