Ega Mini Trunking consists of a range of sizes of extruded PVC-U sections for the containment of electrical cable for surface wiring and is ideally suited for refurbishment programmes as well as new installation projects both in the domestic and commercial sectors. The system will cope with a multiplicity of room configurations, allowing the designer and specifier a free reign to design the correct and most effective installation. Ega Mini Trunking also allows for quick and simple extensions to the existing system. Speedfix Mini Trunking is complete with an acrylic foam adhesive for fast location of power circuits and secure containment of low voltage wiring.

Manufactured in accordance with BS. 4678 Part 4.

Standard Length: 3 metres

Material: PVC-U

Colour: White

***YT/2 and YT/4 Mini Trunking and Fittings are available in a choice of three colours, white, charcoal or beige.**

When ordering add the appropriate colour suffix WHI, CHA or BGE.

Red Mini Trunking is also available (25 x 16 mm only)

See Red Alert on page 130
