Description

PI6C4120x is a high-performance LVCMOS or LVTTL to LVPECL clock buffer. The PI6C41204 is a 4 output version with 2 selectable inputs, pin compatible with ICS8535-01. PI6C41204A is the enhanced version with extra power and ground pins to minimize noise and jitter. The PI6C41202 is similar to the PI6C41204 except it has two outputs.
