

| 構 造(Structure): シリコンヨ 製品名(Product) : | Eノリシック集積回路(Silicon Monolithic 5.1ch モードセレクタ・入力セレクタゆ (5.1ch Sound Processors with Built- | う蔵サウンドプロセッサ |
|---|---|---|
| 形 名 (Type): | BD3474KS2 | |
| パッケージ(Package) : | SQFP-T80C | |
| 機能(Function) : | •Electronic Volume: •Stereo Input Selector: •Mode Selector: •REC Output: | +32 ~ −95dB / 0.5dB step, Mute IN1 ~ IN12, Mute LINE, MULTI1, MULTI2, MUte 4 stereo output |

MAIN Output:

Input Att for ADC

•2 Band Equalizer

1 stereo output 0, -6, -6.5, -7.5, -9, -12dB, Mute +10 ∼ -10dB / 1dB step

O絶対最大定格 (Absolute Maximum Ratings) (Ta=25℃)

| 項目 (Item) | 記号 (Symbol) | 定格 (Rating) | 単位 (Unit) |
|-------------------------------|-------------|-------------------|-----------|
| 正電源電圧(Positive power supply) | Vcc | +7.75 ※1 | V |
| 負電源電圧(Negative power supply) | Vee | -7.75 ※1 | V |
| 許容損失(Power dissipation) | Pd | 1750 ※2 | mW |
| 入力電圧範囲(Input voltage) | Vin | Vee-0.2 ~ Vcc+0.2 | V |
| 動作温度範囲(Operating temperature) | Topr | $-40 \sim +85$ | °C |
| 保存温度範囲(Storage temperature) | Tastg | $-55 \sim +125$ | °C |

※1:GND を基準として、印加できる最大電圧。(Based on GND, the maximum voltage which can impress.) ※2:Ta>25℃では、17.5mW/℃で軽減。ローム標準基板(サイズ:70mm×70mm×1.6mm)装着時。

(This value decreases 17.5mW/°C for Ta=25°C or more. A standard board, 70×70×1.6 mm, shall be mounted.) ※3:動作電圧範囲内であれば、動作温度範囲内で一応の回路機能動作が保証されています。

許容損失の条件も温度と関連しますのでご注意下さい。

また、この範囲内の電気的特性で定められている条件以外では、その電気的特性の規格値を保証できませんが、本来の機能は維持しています。

(If it within operation voltage range, circuit function operation is guaranteed within operation temp.

It corralled to conditions of power dissipation to temp.

Please watch out except condition stipulated by electrical characteristics within the range, It cannot guarantee standard value of electrical characteristics. But it retains original function.)

O動作条件(Operating Condition) (Ta=25℃)

| 項目(Item) | 記号(Symbol) | 範囲 (Range) | 単位 (Unit) |
|------------------------------|------------|-----------------|-----------|
| 正電源電圧(Positive power supply) | Vcc | +6.5 ~ +7.5 %4 | V |
| 負電源電圧(Negative power supply) | Vee | -6.5 ~ -7.5 💥 4 | V |

※4:GND を基準。(Based on GND.)

※5:動作温度範囲内であれば動作電圧範囲で基本の回路機能動作が保証されていますが、ご使用の際には よくご確認上、定数と素子の設定、電圧設定、温度設定をお願いします。

また、この範囲内の電気的特性で定められている条件以外では、その電気的特性の規格値を保証できませんが、本来の機能は維持しています。

(Within operation temp range, basic circuit function Operation is guaranteed within operation voltage range. But please confirm set up of constant and element, voltage set up and temp set up on use.

Please watch out except condition stipulated by electrical characteristics within the range, It cannot guarantee standard value of electrical characteristics. But it retains original function.)

〇応用回路図 (Application Circuit Diagram)

配線上の注意

① GND は太く基準GNDから取って下さい。

②CL、DAの配線パターンはアナログ部の配線パターンから離して、クロストークしないようにして下さい。

- ③CL、DAの配線パターンは、なるべく平行に引かないで下さい。隣接する時はシールドするようにして下さい。
- ④入力セレクタの入力端子の配線パターンはクロストークに注意して下さい。 配線間をシールドすることを推奨致します。
- ⑤ 電源のデカップリングコンデンサは、VCC,GND,VEE に対して、出来るだけ最短距離で接続してください。

Notes on wiring

① GND shall be wired from reference point and thicken.

- (2) Wiring pattern of CL and DA shall be away from that of analog unit and cross-talk shall not be acceptable.
- ③ Lines of CL and DA of shall not be parallel if possible. The lines shall be shielded, if they are adjacent to each other.
- ④ Please pay attention the wiring pattern of the input terminal of the input selector to the cross talk. Recommend that wiring period is shielded.
- (5) Please connect the decoupling capacitor of a power supply in the shortest distance as much as possible to VCC and GND, VEE.

Oバス・フィルタの定数設定 (Constant set-up of bass filter)

R2、R3の標準値(参考) (Standard value of R2 and R3 (reference)) (R1=6.8KΩ, C1=C2)

※実際のブースト・カット量は若干ずれることがあります。 Actual boost and cut amount is differ somewhat.

〇使用上の注意 (Note on use)

(1)絶対最大定格について (Absolute maximum ratings)

印加電圧及び動作温度範囲などの絶対最大定格を超えた場合は、LSI が破壊することがあります。絶対最大定格を超える電圧及び温度を印加しないでください。絶対最大定格を超えるような事が考えられる場合には、ヒューズなどの物理的な安全対策を実施して頂き、LSI に絶対最大定格を超える条件が印加されないようご検討ください。

If applied voltage, operating temperature range, or other absolute maximum ratings are exceeded, the LSI may be damaged. Do not apply voltages or temperatures that exceed the absolute maximum ratings. If you think of a case in which absolute maximum ratings are exceeded, enforce fuses or other physical safety measures and investigate how not to apply the conditions under which absolute maximum ratings are exceeded to the LSI.

(2)Vee 電位について (Vee potential)

Vee 端子の電圧はいかなる動作状態においても、最低電圧になるようにしてください。過渡現象を含めて、各端子電圧が Vee 端子よりも低い電圧になっていないことを実際にご確認下さい。

Make the Vee pin voltage such that it is the lowest voltage even when operating below it. Actually confirm that the voltage of each pin does not become a lower voltage than the Vee pin, including transient phenomena.

(3)熱設計について (Thermal design)

実使用状態での許容損失を考慮して、十分なマージンを持った熱設計を行ってください。

Perform thermal design in which there are adequate margins by taking into account the allowable power dissipation in actual states of use.

(4)端子間ショートと誤実装について (Shorts between pins and misinstallation)

LSI を基板に実装する時には、LSI の方向や位置ずれに十分注意してください。誤って実装し通電した場合、LSI を破壊することがあります。また、LSIの端子間や端子と電源間、端子とGND 間に異物が入るなどしてショートした場合についても破壊することがあります。

When mounting the LSI on a board, pay adequate attention to orientation and placement discrepancies of the LSI. If it is misinstalled and the power is turned on, the LSI may be damaged. It also may be damaged if it is shorted by a foreign substance coming between pins of the LSI or between a pin and a power supply or a pin and a GND.

(5)強電磁界内での動作について(Operation in strong magnetic fields)

強電磁界内での使用は、誤動作をする可能性がありますので十分ご評価ください。

Adequately evaluate use in a strong magnetic field, since there is a possibility of malfunction.

(6)動作電圧範囲及び動作温度範囲について (About Operating Voltage Range and Operating Temperature Range) 回路機能動作に対しては、動作電圧範囲及び動作温度範囲内で保証しています。ただし、電気的特性の規格値はその電気的特性の規定条件での保証となります。したがいまして、IC の特性変動を十分考慮のうえ、セット設計をしてください。 The circuit functional operations are guaranteed within the Operating Voltage Range and Operating Temperature Range. The standard values of electrical characteristics, however, are guaranteed under the specific conditions. Accordingly, careful consideration of the IC characteristic variations is required to design a set of circuit.

(7)電源 ON/OFF 時について (About power ON/OFF)

①電源 ON/OFF 時はショック音が発生しますので、セット上にて MUTE をかけてください。

At power ON/OFF, a shock sound will be generated and, therefore, use MUTE on the set.

②電源の立ち上げ時は、VEEとVCCを同時に立ち上げるか、VEE 側を早く立ち上げてください。

VCC 側を先に立ち上げますと VCC-VEE 間に過大な電流が流れます。

When turning on power supplies, VEE and VCC should be powered on simultaneously or VEE first; then followed by VCC. If the VCC side is started up first, an excessive current may pass VCC through VEE.

(8)シリアルコントロールについて (About serial control)

CL 端子、DA 端子はアナログ信号系のラインへ干渉しないように配線及びパターン配線してください。

For the CL and DA terminals, the patterned and other wirings should be routed not to cause interference with the analog-signal-related lines.

(9)ファンクション切り替えについて (About function switching)

入力セレクタ、モードセレクタ、入力ゲイン等を切り替える時はボリウムにて MUTE をかけてください。

When switching Input Selector, Mode selector or Input Gain, use MUTE on Volume.

| | g or reproduction of this document, in part or in whole, is permitted without the ROHM Co.,Ltd. |
|---|---|
| The conter | nt specified herein is subject to change for improvement without notice. |
| "Products | nt specified herein is for the purpose of introducing ROHM's products (hereinafte '). If you wish to use any such Product, please be sure to refer to the specifications be obtained from ROHM upon request. |
| illustrate th | of application circuits, circuit constants and any other information contained herein the standard usage and operations of the Products. The peripheral conditions mus to account when designing circuits for mass production. |
| However, | was taken in ensuring the accuracy of the information specified in this document should you incur any damage arising from any inaccuracy or misprint of such n, ROHM shall bear no responsibility for such damage. |
| examples implicitly, a other parti | cal information specified herein is intended only to show the typical functions of and of application circuits for the Products. ROHM does not grant you, explicitly o any license to use or exercise intellectual property or other rights held by ROHM and es. ROHM shall bear no responsibility whatsoever for any dispute arising from the h technical information. |
| equipment | cts specified in this document are intended to be used with general-use electroni- c or devices (such as audio visual equipment, office-automation equipment, commu evices, electronic appliances and amusement devices). |
| The Produ | cts specified in this document are not designed to be radiation tolerant. |
| | HM always makes efforts to enhance the quality and reliability of its Products, a ay fail or malfunction for a variety of reasons. |
| against the failure of a shall bear | sure to implement in your equipment using the Products safety measures to guard e possibility of physical injury, fire or any other damage caused in the event of the ny Product, such as derating, redundancy, fire control and fail-safe designs. ROHM no responsibility whatsoever for your use of any Product outside of the prescribed ot in accordance with the instruction manual. |
| system wh may result instrument controller of the Pro | icts are not designed or manufactured to be used with any equipment, device of hich requires an extremely high level of reliability the failure or malfunction of which in a direct threat to human life or create a risk of human injury (such as a medica c, transportation equipment, aerospace machinery, nuclear-reactor controller, fuel- or other safety device). ROHM shall bear no responsibility in any way for use of an ducts for the above special purposes. If a Product is intended to be used for an ial purpose, please contact a ROHM sales representative before purchasing. |
| be control | nd to export or ship overseas any Product or technology specified herein that ma led under the Foreign Exchange and the Foreign Trade Law, you will be required to cense or permit under the Law. |
