

Dye Sensitised Indoor Photovoltaic Module

Indy3050 data sheet

Power connections are suitable for crimp connection or soldered connection with the appropriate use of heat-shunt tweezers to ensure minimal heating of the polymer material.

G24i's dye sensitised indoor photovoltaic modules have been optimised to work under indoor lighting providing the highest power density.

This evaluation module is intended for development, demonstration or evaluation purposes only. G24i does not provide this module as a finished product fit for general use. Persons handling the module must have electronics training and observe good engineering practice standards. G24i reserves the right to change the module specification at any time.
