## DESCRIPTION

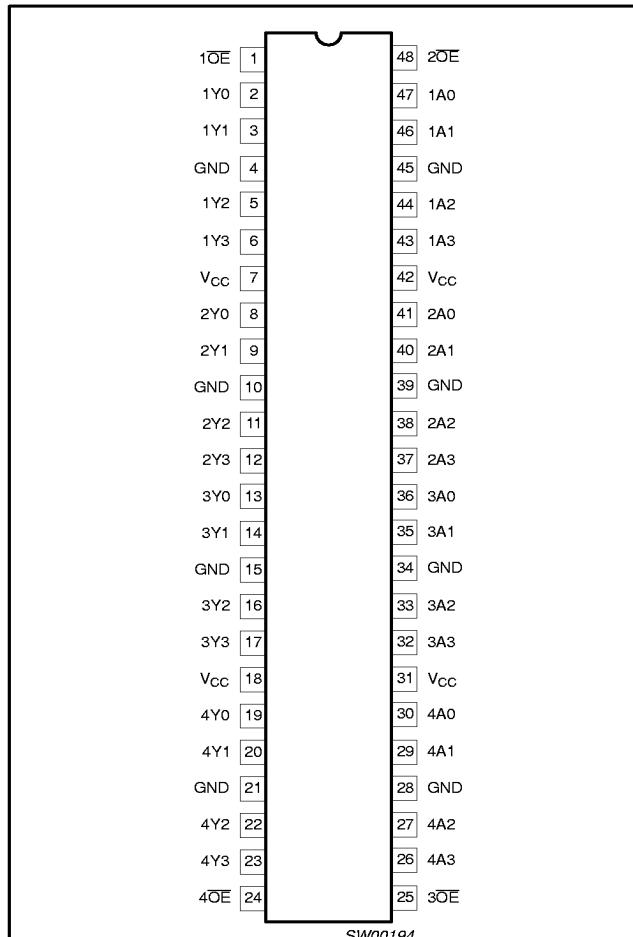

The 74LVC(H)16244A is a high-performance, low-power, low-voltage, Si-gate CMOS device, superior to most advanced CMOS compatible TTL families. Inputs can be driven from either 3.3V or 5V devices. In 3-State operation, outputs can handle 5V. These features allow the use of these devices in a mixed 3.3V/5V environment.

The 74LVC(H)16244A is a 16-bit non-inverting buffer/line driver with 3-State outputs. The device can be used as four 4-bit buffers, two 8-bit buffers or one 16-bit buffer. The 3-State outputs are controlled by the output enable inputs  $\bar{1OE}$  and  $\bar{2OE}$ . A HIGH on  $\bar{nOE}$  causes the outputs to assume a high impedance OFF-state. The device can be used as four 4-bit buffers, two 8-bit buffers or one 16-bit buffer.

The 74LVC(H)16244A is identical to the 74LVC16240A but has non-inverting outputs.

The 74LVCH16244A bus hold data inputs eliminates the need for external pull up resistors to hold unused inputs.

$$P_D = C_{PD} \times V_{CC}^2 \times f_i + \sum (C_L \times V_{CC}^2 \times f_o) \text{ where:}$$

$f_i$  = input frequency in MHz;  $C_L$  = output load capacity in pF;

1. Stresses beyond those listed may cause permanent damage to the device. These are stress ratings only and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

### NOTES:

- All typical values are at  $V_{CC} = 3.3V$  and  $T_{amb} = 25^\circ C$ .
- Valid for data inputs of bus hold parts (LVCH16-A) only.
- For data inputs only, control inputs do not have a bus hold circuit.
- The specified sustaining current at the data input holds the input below the specified  $V_I$  level.
- The specified overdrive current at the data input forces the data input to the opposite logic input state.
- For bus hold parts, the bus hold circuit is switched off when  $V_I$  exceeds  $V_{CC}$  allowing 5.5V on the input terminal.
