

## General Description

The AOZ8205 is a transient voltage suppressor (TVS) diode array designed to protect data lines from high transient conditions and ESD. This state-of-the-art device utilizes AOS leading edge Trench Vertical Structure [TVS]<sup>2</sup>™ technology for superior clamping performance.

This device incorporates five TVS diodes in a single package. Due to the flexibility of the design, the package can be configured as a four channel bidirectional TVS array or five channel unidirectional TVA array. During transient conditions, the TVS diodes direct the transient to ground. They may be used to meet the ESD immunity requirements of IEC 61000-4-2, Level 4 (±15kV air, ±8 kV contact discharge).

The AOZ8205 comes in an RoHS compliant DFN 1.6 mm x 1.6 mm package and is rated over a -40 °C to +85 °C ambient temperature range.

The very small DFN package makes the AOZ8205 ideal for applications where PCB space is a premium. The small size and high ESD protection makes it ideal for protecting high speed video and data communication interfaces.

## Features

- ESD protection for high-speed data lines:
  - Exceeds: IEC 61000-4-2 (ESD) ±30 kV (air), ±30 kV (contact)
  - Human Body Model (HBM) ±30 kV
- Trench Vertical Structure [TVS]<sup>2</sup>™ based technology used to achieve excellent ESD clamping performance
- Small package saves board space
- Low insertion loss
- Protects five unidirectional or four bidirectional I/O lines
- Low clamping voltage
- Low operating voltage: 5.0 V
- Green product, Pb-free

## Applications

- Portable handheld devices
- Keypads, data lines
- Notebook computers
- Digital Cameras
- Portable GPS
- MP3 players

## Typical Applications

Unidirection Protection of Five Lines

Bidirection Protection of Four Lines

## Pin Configuration

## Ordering Information

Part Number	Ambient Temperature Range	Package	Environmental
AOZ8205DI	-40 °C to +85 °C	DFN 1.6 mm x 1.6 mm	Green Product RoHS Compliant

AOS Green Products use reduced levels of Halogens, and are also RoHS compliant.  
Please visit [www.aosmd.com/web/quality/rohs\\_compliant.jsp](http://www.aosmd.com/web/quality/rohs_compliant.jsp) for additional information.

## Absolute Maximum Ratings

Exceeding the Absolute Maximum ratings may damage the device.

Parameter	Rating
VP – VN	5 V
Peak Pulse Current ( $I_{PP}$ ), $t_P = 8/20 \mu s$	5 A
Storage Temperature ( $T_S$ )	-65 °C to +150 °C
ESD Rating per IEC61000-4-2, Contact <sup>(1)</sup>	±30 kV
ESD Rating per IEC61000-4-2, Air <sup>(1)</sup>	±30 kV
ESD Rating per Human Body Model <sup>(2)</sup>	±30 kV

### Notes:

- IEC 61000-4-2 discharge with  $C_{Discharge} = 150pF$ ,  $R_{Discharge} = 330\Omega$ .
- Human Body Discharge per MIL-STD-883, Method 3015  $C_{Discharge} = 100pF$ ,  $R_{Discharge} = 1.5k\Omega$ .

## Maximum Operating Ratings

Parameter	Rating
Junction Temperature ( $T_J$ )	-40 °C to +125 °C

## Electrical Characteristics

$T_A = 25^\circ C$  unless otherwise specified. Specifications in **BOLD** indicate a temperature range of -40°C to +85°C.

Symbol	Parameter	Conditions	Min.	Typ.	Max.	Units
$V_{RWM}$	Reverse Working Voltage	Between pin 5 and 2 <sup>(3)</sup>			5.0	V
$V_{BR}$	Reverse Breakdown Voltage	$I_T = 1 \text{ mA}$ , between pins 5 and 2 <sup>(4)</sup>	<b>6.0</b>			V
$I_R$	Reverse Leakage Current	$V_{RWM} = 5 \text{ V}$ , between pins 5 and 2			<b>0.1</b>	$\mu A$
$V_F$	Diode Forward Voltage	$I_F = 15 \text{ mA}$	<b>0.70</b>	<b>0.85</b>	<b>1</b>	V
$V_{CL}$	Channel Clamp Voltage Positive Transients	$I_{PP} = 15 \text{ A}$ , $t_P = 100 \text{ ns}$ , any I/O pin to Ground			7.0	V
	Negative Transient				-6.75	V
$V_{CL}$	Channel Clamp Voltage Positive Transients	$I_{PP} = 25 \text{ A}$ , $t_P = 100 \text{ ns}$ , any I/O pin to Ground			7.50	V
	Negative Transient				-10.25	V
$C_j$	Junction Capacitance	$V_R = 0V$ , $f = 1 \text{ MHz}$ , any I/O pin to Ground		15	17	pF

### Notes:

- The working peak reverse voltage,  $V_{RWM}$ , should be equal to or greater than the DC or continuous peak operating voltage level.
- $V_{BR}$  is measured at the pulse test current  $I_T$ .

## Typical Performance Characteristics

Clamping Voltage vs. Peak Pulse Current  
(tperiod = 100ns, tr = 1ns)

Clamping Voltage vs. Current  
(tperiod = 100ns, tr = 1ns)

I/O – Gnd Insertion Loss (S21) vs. Frequency  
(V<sub>p</sub> = 3.3V)

Capacitance vs. Reverse Bias

## Applications Information

### Device Connection for Protection of Five Unidirectional Data Lines

These devices are designed to protect up to five unidirectional data lines. The device is connected as follows.

- Unidirectional protection of five I/O lines is achieved by connecting pins 1, 3, 4, 5 and 6 to the data lines. Connect pin 2 to ground. The ground connection should be made directly to the ground plane for best results. The path length is kept as short as possible to reduce the effects of parasitic inductance in the board traces.

Circuit Diagram

Protection of Five Unidirectional Lines

### Device Connection for Protection of Four Bidirectional Data Lines

These devices are designed to protect up to four bidirectional data lines. The device is connected as follows.

- Bidirectional protection of four I/O lines is achieved by connecting pins 1, 3, 4, and 6 to the data lines. Connect pin 5 to ground. The ground connection should be made directly to the ground plane for best results. The path length is kept as short as possible to reduce the effects of parasitic inductance in the board traces.

Circuit Diagram

Protection of Four Bidirectional Lines

### Circuit Board Layout Recommendations for Suppression of ESD

Good circuit board layout is critical for the suppression of ESD induced transients. The following guidelines are recommended:

- Place the TVS near the input terminals or connectors to restrict transient coupling.
- Minimize the path length between the TVS and the protected line.
- Minimize all conductive loops including power and ground loops.
- The ESD transient return path to ground should be kept as short as possible.
- Never run critical signals near board edges.
- Use ground planes whenever possible.

Package Dimensions, DFN 1.6 x 1.6, 6L

RECOMMENDED LAND PATTERN

Dimensions in millimeters

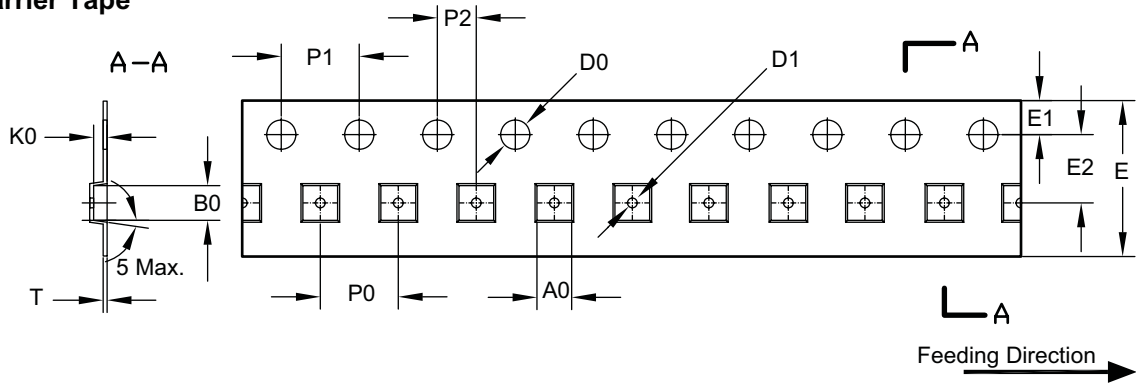

Symbols	Min.	Nom.	Max.
A	0.50	0.55	0.60
A1	0.00	0.02	0.05
b	0.22	0.25	0.28
c	1.52 REF.		
D	1.55	1.60	1.65
E	1.55	1.60	1.65
e	0.50 BSC		
e1	1.0 REF		
L	0.225	0.275	0.325

Notes:

1. Dimensions and tolerancing conform to ASME Y14.5M-1994.
2. All dimensions are in millimeters.

## Park Marking

**This data sheet contains preliminary data; supplementary data may be published at a later date. Alpha & Omega Semiconductor reserves the right to make changes at any time without notice.**

### LIFE SUPPORT POLICY

ALPHA & OMEGA SEMICONDUCTOR PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS.

As used herein:

1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body or (b) support or sustain life, and (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury of the user.
2. A critical component in any component of a life support, device, or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
