$R_{DS(ON)}$	7.2 $\Omega$
$I_D$	1.9A

## Description

Advanced Power MOSFETs from APEC provide the designer with the best combination of fast switching, ruggedized device design, low on-resistance and cost-effectiveness.

The TO-252 package is widely preferred for all commercial-industrial applications at power dissipation levels to approximately 50 watts. The through-hole version (AP02N90J) is available for low-profile applications.
