

SERIES MHV (H4)

HIGH VOLTAGE CONNECTORS

Description

SUHNER MHV connectors are coaxial miniature high voltage (MHV = Miniature High Voltage) connectors with 5 kV rms test voltage (mated pairs). The MHV connectors have a working voltage up to 1.6 kV rms in mated condition and are suitable for applications up to 300 MHz. MHV connectors are of similar design to BNC connectors but the insulators protrude over the outer contacts to give a degree of shock-protection when unmated. However, if a high degree of shock protection in the unmated condition is required, use of series SHV is recommended.
