DESCRIPTION

The 26LS32/32A is a quad line receiver designed to meet all of the requirements of RS-422 and RS-423 and Federal Standards 1020 and 1030 for balanced and unbalanced digital data transmission.

The 26LS32/32A features an input sensitivity of $\pm 200\text{mV}$ over the common mode input range of $\pm 7\text{V}$.

The 26LS32/32A provides an enable and disable function common to all four receivers. Both the parts feature 3-State outputs with 8mA sink capability and incorporates a fail-safe input-output relationship which forces the outputs high when the inputs are open.
