MI-200™

Product Highlights

The MI Series is designed for Military applications and is based on Vicor's second generation family of zero-currentswitching, component level DC-DC converters. Operating at frequencies in excess of 1MHz, the MI Series offers state-of-the-art performance in terms of power density, efficiency, noise, ease of use, and reliability.

All units are manufactured under a quality system approved to MIL-I-45208 and in ISO 9001-registered facilities. Full epoxy encapsulation in Vicor's industry standard package enables the MI Series to meet MIL-STD-810 environmental requirements for humidity, fungus, salt, fog, explosive atmosphere, acceleration, vibration, and shock.

Standard features such as wide output trimming/programming, current limiting, remote sense, output inhibit and latching OVP and OTP combine to offer a high degree of protection, versatility and reliability for military power systems.

DC-DC Converters

Military High-Density 50 to 100W

Features:

- > Inputs: 28Vdc per MIL-STD-704D/E 155Vdc per DOD-STD-1399A 270Vdc per MIL-STD-704D/E
- Single Output: 1 to 95Vdc
- Up to 23 W/in³
- MIL-STD-810 Environments
- 80-90% Efficiency

- Remote Sense
- **Current Limit**
- **OVP** and Thermal Shutdown
- Power Boosters for **Higher Power Outputs**
- **ZCS** Power Architecture
- Low Noise FM Control

Converter/Booster Specifications
