The XWD series are high powered dual output DC to DC converters that cover a wide range of applications. Available input voltages include 12V, 24V, 48V, and 60V, output voltages are available from 5V to 15V. The XWD features remote sense leads for accurate point of load regulation, and has short circuit and over current protection. For single and triple output high power solutions, see IPD's XWS and XWT series of converters.
