

## SOT- 23 SMD Use Advantages

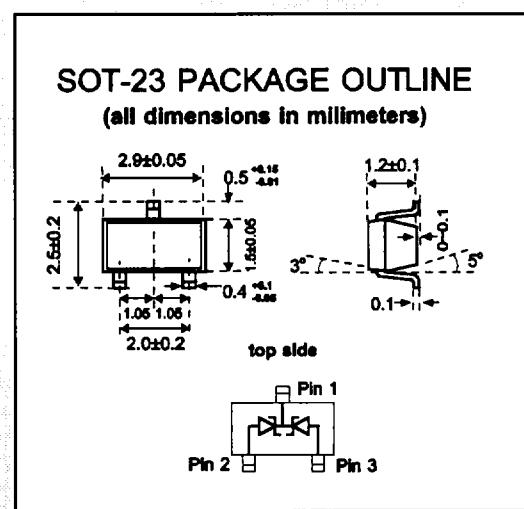

## Dual Zener Diodes DZ23-C2V7 thru DZ23-C51

These Pro Electron zener diodes use lower zener test currents popular in so many of today's battery powered applications. For use in clipping and stabilizing circuits, where local protection is needed. The two zeners diodes in the same plastic package allow for higher density board design. Compatible with all major automatic assembly equipment.
