

SMD Inductors(Coils) For High Frequency(Multilayer)

Conformity to RoHS Directive

MLK Series MLK1005

FEATURES

- Supports operating frequency bands of up to 12GHz with nominal inductance values from 1 to 100nH.
- Provides high Q characteristics.
- Advanced monolithic structure is formed using a multilayering and sintering process with ceramic and conductive materials for high-frequency.
- Because the part is non-polarized, it can be used in bulk cassette loaders.
- It is a product conforming to RoHS directive.

APPLICATIONS

For high-frequency applications including mobile phones, high frequency modules (PA, VCO, FEM etc.), Bluetooth, W-LAN, UWB and tuners.

SHAPES AND DIMENSIONS

Weight: 1.0mg

RECOMMENDED PC BOARD PATTERN

Dimensions in mm

RECOMMENDED SOLDERING CONDITION REFLOW SOLDERING

- Conformity to RoHS Directive: This means that, in conformity with EU Directive 2002/95/EC, lead, cadmium, mercury, hexavalent chromium, and specific bromine-based flame retardants, PBB and PBDE, have not been used, except for exempted applications.

- Please contact our Sales office when your application are considered the following:
The device's failure or malfunction may directly endanger human life (e.g. application for automobile/aircraft/medical/nuclear power devices, etc.)

- All specifications are subject to change without notice.

PRODUCT IDENTIFICATION

SPECIFICATIONS

| | |
|-----------------------------|---------------------------------|
| Operating temperature range | -55 to +125°C |
| Storage temperature range | -55 to +125°C [Unit of product] |

PACKAGING STYLE AND QUANTITIES

| | |
|-----------------|-------------------|
| Packaging style | Quantity |
| Taping | 10000 pieces/reel |

HANDLING AND PRECAUTIONS

- Before soldering, be sure to preheat components.
The preheating temperature should be set so that the temperature difference between the solder temperature and product temperature does not exceed 150°C.
- After mounting components onto the printed circuit board, do not apply stress through board bending or mishandling.
- When hand soldering, apply the soldering iron to the printed circuit board only. Temperature of the iron tip should not exceed 350°C. Soldering time should not exceed 3 seconds.

- Test equipment

- Inductance Q : HP4291A+16193A, or equivalent

- SRF: HP8720C, or equivalent

- Rdc: YOKOGAWA TYPE7561, or equivalent

- Rated current: Value obtained when current flows and temperature has risen to 20°C.
