

# SOD- 123 SMD

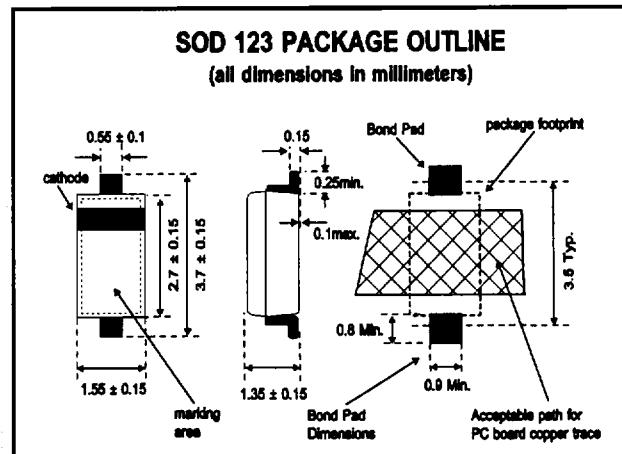

Zener Diodes  
BZT52-C2V7  
thru  
BZT52-C51

## Use Advantages

These Pro Electron zener diodes use lower zener test currents popular in so many of today's battery powered applications.  
For use in clipping and stabilizing circuits, where local protection is needed.  
Replaces SMA, MELF or SOD-80 packages on boards without redesign.  
Compatible with all major automatic assembly equipment.

## Features

- Small size
- High quality
- Thermally matched system
- Few applications restrictions
- Thermo-compression bonding
- DO-35 axial leaded types available
- Also comes in a glass Mini Melf SMD
