

Ultra Low Quiescent Current Linear Regulator

UM153xxS SOT23-3

UM153xxY SOT89-3

UM154xxS SOT23-5

General Description

The UM153xx/UM154xx series are ultra low quiescent current low dropout linear regulators designed for low power portable applications. The range of output voltage is from 1.3V to 5.0V while operated from 2.2V to 5.5V input. The EN function of UM154xx can disable the entire circuit to be in shutdown state by inputting low level signal.

The UM153xx/UM154xx series offer high output voltage accuracy, excellent transient response, stability with ultra low ESR ceramic capacitors as small as 1 μ F, thermal overload protection and output current limiting. The UM153xx is available in a low profile SOT23-3 or SOT89-3 package. The UM154xx is available in a low profile SOT23-5 package.

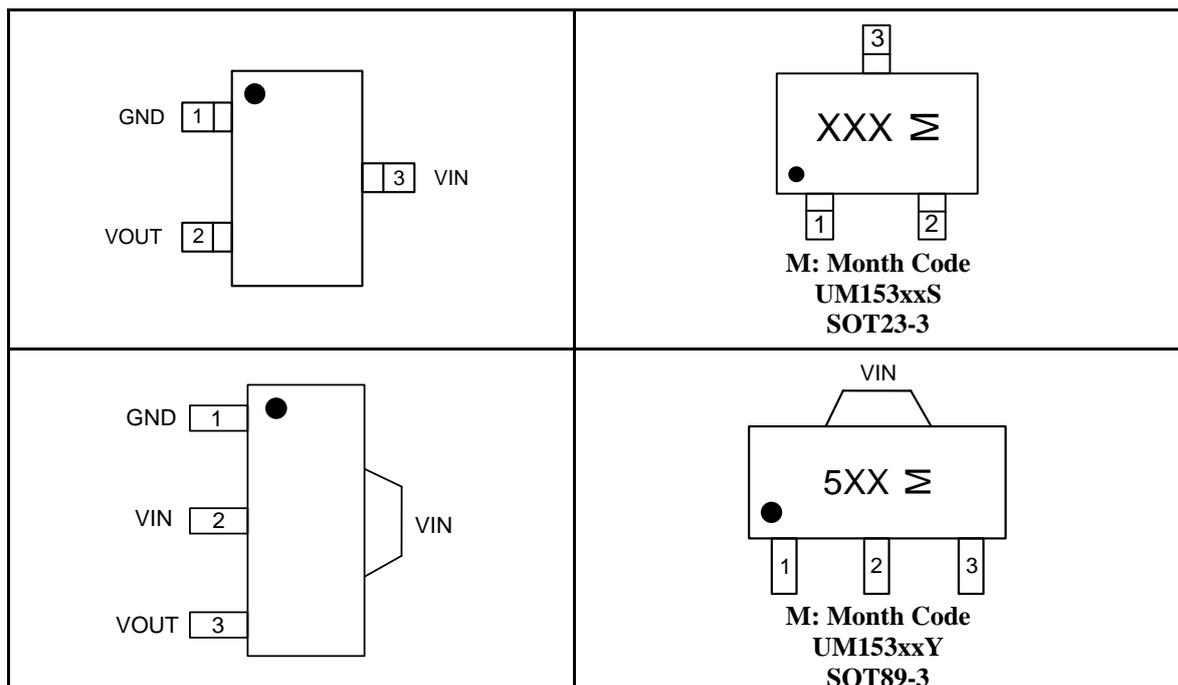

Applications

- Battery-Powered Systems
- Reference voltage sources
- Cameras, Video cameras
- Portable AV systems
- Portable games
- Cellular Phones

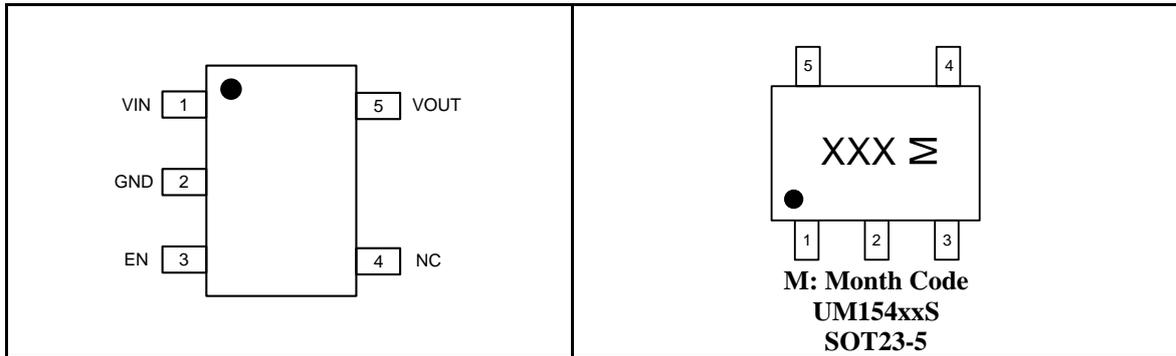

Features

- Maximum Input Voltage: 5.5V
- $\pm 2.0\%$ Voltage Accuracy at 30mA
- Fast Transient Response
- Output Current Limit
- Stable with 1 μ F Output Capacitor
- Thermal Overload Protection
- Low Profile SOT23-3 or SOT89-3 Package(UM153xx)
- Low Profile SOT23-5 Package(UM154xx)

Absolute Maximum Ratings (Note 1)

| Symbol | Parameter | Value | Unit |
|-----------|---|--------------|------|
| V_{IN} | Supply Voltage on IN Pin | -0.3 to +6.5 | V |
| V_{OUT} | Voltage on OUT Pin | -0.3 to +6.5 | V |
| V_{EN} | Voltage on EN Pin | -0.3 to +6.5 | V |
| T_J | Operating Junction Temperature (Notes 2, 3) | -40 to +125 | °C |
| T_{STG} | Storage Temperature Range | -65 to +150 | °C |
| T_L | Lead Temperature for Soldering 10 seconds | +300 | °C |

Recommended Operating Conditions (Note 4)

| | |
|----------------------------|------------------|
| Supply Input Voltage | 2.2 V to 5.5V |
| Junction Temperature Range | -40 °C to 125 °C |
| Ambient Temperature Range | -40 °C to 85 °C |

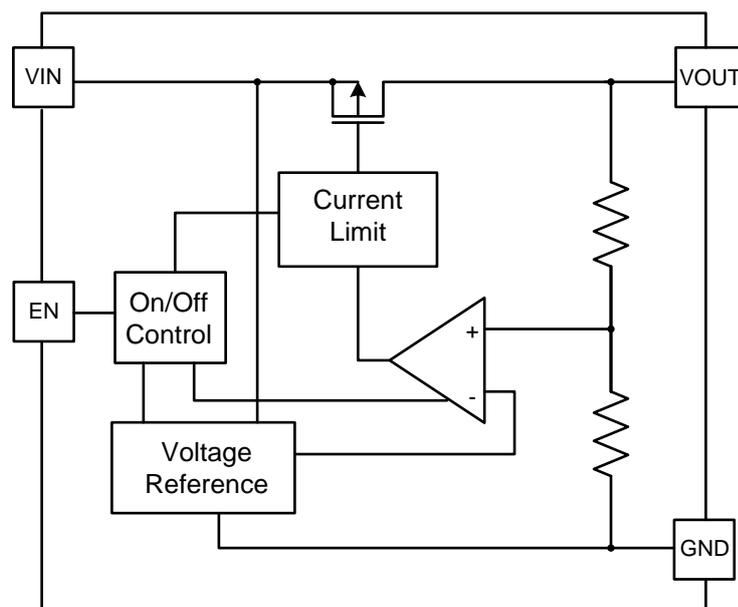

Note 1: Absolute Maximum Ratings are those values beyond which the life of a device may be impaired.

Note 2: The device is guaranteed to meet performance specifications from -40 °C to +85 °C. Specifications over the -40 °C to 125 °C operating junction temperature range are guaranteed by design, characterization and correlation with statistical process controls.

Note 3: This IC includes over temperature protection circuit inside that is intended to protect the device during momentary overload conditions. Over temperature protection trip point is around 160 °C. Continuous operation above the specified maximum operating junction temperature may impair device reliability.

Note 4: The device is not guaranteed to function outside its operating conditions.

Applications Information

Output Capacitance and Transient Response

The UM153xx/UM154xx series regulators are designed to be stable with a wide range of output capacitors. The ESR of the output capacitor affects stability, most notably with small capacitors. A minimum output capacitor of 1µF with an ESR of 0.3Ω or less is recommended to ensure stability. The device's output transient response will be a function of output capacitance. Larger values of output capacitance decrease the peak deviations and provide improved transient response for larger load current changes. Extra consideration must be given to the use of ceramic capacitors. The X5R and X7R dielectrics result in more stable characteristics and are more suitable for use as the output capacitor. The X7R type has better stability across temperature, while the X5R is less expensive and is available in higher values.

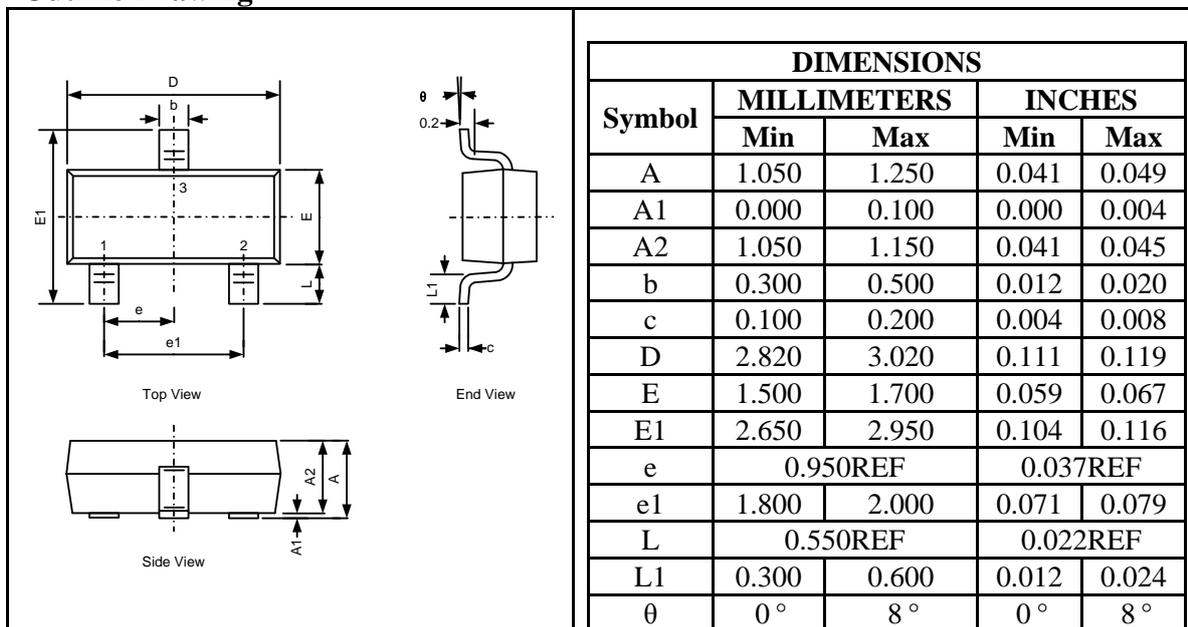

Thermal Protection

Thermal protection disables the output when the junction temperature rises to approximately +160 °C allowing the device to cool. When the junction temperature cools to approximately +140 °C the output circuit is again enabled.
