DESCRIPTION

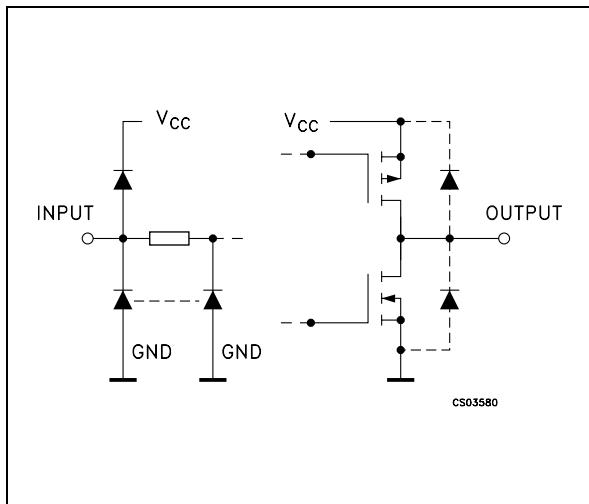

The M74HC593 is an high speed CMOS 8-BIT REGISTER COUNTER (3 STATE) fabricated with silicon gate C²MOS technology. This device consists of a parallel input, 8 bit storage register feeding an 8 bit binary counter. Both the counter and register clocks are positive edge triggered. In addition, the counter has direct load and clear functions. Expansions is easily

accomplished by connecting RCO of first stage to the count enable CCKEN, of the second stage etc. The M74HC593 comes in a 20 pin package and has 3 state I/O, which provides parallel counter outputs.

All inputs are equipped with protection circuits against static discharge and transient excess voltage.
