

# SAW Components

## SAW Duplexer

WCDMA / LTE Band 1 / CDMA 1x

<b>Series/type:</b>	<b>B8635</b>
<b>Ordering code:</b>	<b>B39212B8635P810</b>
Date:	November 19, 2014
Version:	2.3

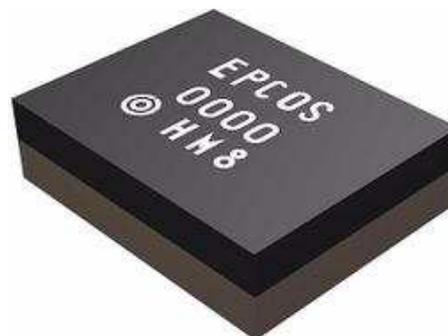

© EPCOS AG 2015. Reproduction, publication and dissemination of this publication, enclosures hereto and the information contained therein without EPCOS' prior express consent is prohibited.

EPCOS AG is a TDK Group Company.

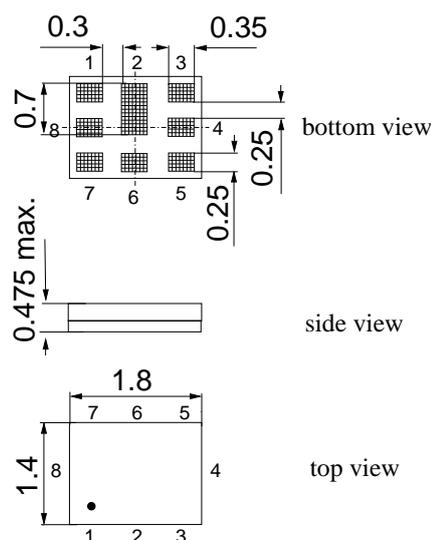

Data sheet

**Application**

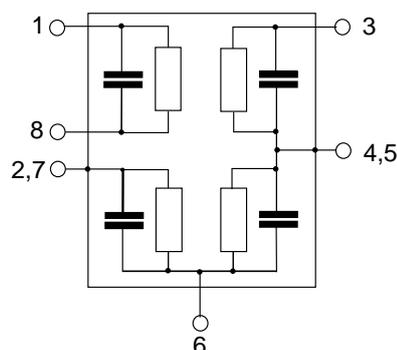

- Low-loss SAW duplexer for mobile telephone WCDMA / LTE Band 1 and CDMA 1x systems
- Low insertion attenuation
- Low amplitude ripple
- Usable passband 60 MHz
- Single-ended to balanced transformation in Antenna-Rx path
- Impedance transformation 50 Ω to 100 Ω in Antenna-Rx path
- High isolation between Tx and Rx

**Features**

- Package size 1.8 x 1.4 mm<sup>2</sup>
- Max. package height 0.475mm
- RoHS compatible
- Approximate weight 0.0038g
- Package for **Surface Mount Technology (SMT)**
- Ni terminals, Au-plated
- Balanced Rx port, unbalanced Tx port
- **Electrostatic Sensitive Device (ESD)**
- **Moisture Sensitive Level 3**

**Pin configuration**

- 3 Tx input, unbalanced
- 6 Antenna
- 1, 8 Rx output, balanced
- 2, 4, 5, 7 To be grounded

**Data sheet**

**Characteristics**

Temperature range for specification:	T = -30 °C to +90 °C
TX terminating impedance:	Z <sub>Tx</sub> = 50 Ω
ANT terminating impedance:	Z <sub>Ant</sub> = 50 Ω    2.7 nH
RX terminating impedance:	Z <sub>Rx</sub> = 100 Ω (balanced)    10.0 nH

Characteristics Tx-Antenna				min.	typ. @ 25 °C	max.	
<b>Center frequency</b>			f <sub>c</sub>	—	1950.0	—	MHz
<b>Maximum insertion attenuation</b>			α <sub>max</sub>				
1920.0	...	1980.0	MHz	—	1.5	2.0	dB
1922.4	...	1977.6	MHz	—	1.4	1.9	dB
			α <sub>WCDMA</sub> <sup>1)</sup>				
<b>Amplitude ripple (p-p)</b>			Δα				
1920.0	...	1980.0	MHz	—	0.6	1.1	dB
1922.4	...	1977.6	MHz	—	0.5	1.0	dB
			α <sub>WCDMA</sub> <sup>1)</sup>				
<b>Error Vector Magnitude</b>			EVM <sup>2)</sup>				
1922.4	...	1977.6	MHz	—	0.7	2.0	%
<b>TX port VSWR</b>							
1920.0	...	1980.0	MHz	—	1.6	2.0	
<b>ANT port VSWR</b>							
1920.0	...	1980.0	MHz	—	1.4	2.0	

1) Attenuation of WCDMA signal (Power Transfer Function). Please refer to page 8 of this document.

2) Error Vector Magnitude (EVM) based on definition given in 3GPP TS 25.141

**Data sheet**

**Characteristics**

Temperature range for specification:	T = -30 °C to +90 °C
TX terminating impedance:	Z <sub>Tx</sub> = 50 Ω
ANT terminating impedance:	Z <sub>Ant</sub> = 50 Ω    2.7 nH
RX terminating impedance:	Z <sub>Rx</sub> = 100 Ω (balanced)    10.0 nH

Characteristics Tx-Antenna				min.	typ. @ 25 °C	max.	
<b>Attenuation</b>			$\alpha$

<sup>1)</sup> Attenuation of WCDMA signal (Power Transfer Function). Please refer to page 8 of this document.

<sup>2)</sup> Valid for room temperature at 25 °C.

Data sheet

**Annotation for characteristics section**

Attenuation of W-CDMA signal (Power Transfer Function,  $\alpha_{W-CDMA}$ ) is determined by

$$\int_{-\infty}^{\infty} |S_{ds21}(f)H_{RRC}(f - f_{Carrier})|^2 df$$

with  $f_{Carrier}$  according to 3GPP TS 25.101 (e.g. for UMTS pass band,  $f_{Carrier}$  ranges from 1922.4 MHz (lowest Tx channel) to 1977.6 MHz (highest Tx channel)). Here,  $H_{RRC}(f)$  is the transfer function of the root-raised cosine transmit pulse shaping filter according to 3GPP TS 25.101 with the following normalization:

$$\int_{-\infty}^{\infty} |H_{RRC}(f)|^2 df = 1$$

Data sheet

**Maximum ratings**

Storage temperature range	$T_{\text{stg}}$	-40/+85	°C	
DC voltage	$V_{\text{DC}}$	5 <sup>1)</sup>	V	
ESD voltage	$V_{\text{ESD}}$	50 <sup>2)</sup>	V	Machine Model
		250 <sup>3)</sup>	V	Human Body Model
		600 <sup>4)</sup>	V	Charged Device Model
Input power at				
1920.0 ... 1980.0 MHz	$P_{\text{in}}$	29	dBm	} continuous wave $T = 50\text{ °C}, 5000\text{ h}$
elsewhere	$P_{\text{in}}$	10	dBm	

1) 168h Damp Heat Steady State acc. to IEC 60068-2-67 Cy

2) acc. to JESD22-A115B (MM - Machine Model), 10 negative and 10 positive pulses.

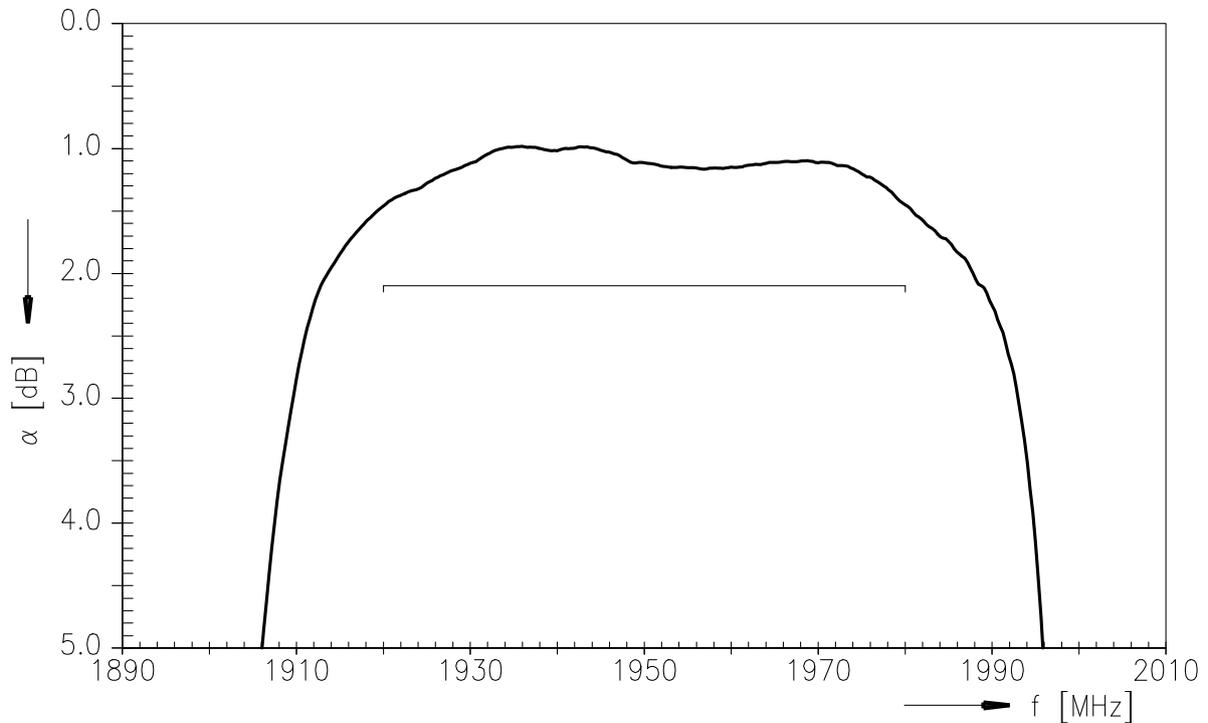

3) acc. to JESD22-A114F (HBM - Human Body Model), 1 negative and 1 positive pulses.

4) acc. to JESD22-C111C (CDM - Charged Device Model), 3 negative and 3 positive pulses.

Due to technical requirements components may contain dangerous substances. For information on the type in question please also contact one of our Sales Offices.

## Important notes

The following applies to all products named in this publication:

1. Some parts of this publication contain **statements about the suitability of our products for certain areas of application**. These statements are based on our knowledge of typical requirements that are often placed on our products in the areas of application concerned. We nevertheless expressly point out **that such statements cannot be regarded as binding statements about the suitability of our products for a particular customer application**. As a rule, EPCOS is either unfamiliar with individual customer applications or less familiar with them than the customers themselves. For these reasons, it is always ultimately incumbent on the customer to check and decide whether an EPCOS product with the properties described in the product specification is suitable for use in a particular customer application.
2. We also point out that **in individual cases, a malfunction of electronic components or failure before the end of their usual service life cannot be completely ruled out in the current state of the art, even if they are operated as specified**. In customer applications requiring a very high level of operational safety and especially in customer applications in which the malfunction or failure of an electronic component could endanger human life or health (e.g. in accident prevention or life-saving systems), it must therefore be ensured by means of suitable design of the customer application or other action taken by the customer (e.g. installation of protective circuitry or redundancy) that no injury or damage is sustained by third parties in the event of malfunction or failure of an electronic component.
3. **The warnings, cautions and product-specific notes must be observed.**
4. In order to satisfy certain technical requirements, **some of the products described in this publication may contain substances subject to restrictions in certain jurisdictions (e.g. because they are classed as hazardous)**. Useful information on this will be found in our Material Data Sheets on the Internet ([www.epcos.com/material](http://www.epcos.com/material)). Should you have any more detailed questions, please contact our sales offices.
5. We constantly strive to improve our products. Consequently, **the products described in this publication may change from time to time**. The same is true of the corresponding product specifications. Please check therefore to what extent product descriptions and specifications contained in this publication are still applicable before or when you place an order. We also **reserve the right to discontinue production and delivery of products**. Consequently, we cannot guarantee that all products named in this publication will always be available. The aforementioned does not apply in the case of individual agreements deviating from the foregoing for customer-specific products.
6. Unless otherwise agreed in individual contracts, **all orders are subject to the current version of the “General Terms of Delivery for Products and Services in the Electrical Industry” published by the German Electrical and Electronics Industry Association (ZVEI)**.
7. The trade names EPCOS, BAOKE, Alu-X, CeraDiode, CeraLink, CeraPlas, CSMP, CSSP, CTVS, DeltaCap, DigiSiMic, DSSP, FilterCap, FormFit, MiniBlue, MiniCell, MKD, MKK, MLSC, MotorCap, PCC, PhaseCap, PhaseCube, PhaseMod, PhiCap, SIFERRIT, SIFI, SIKOREL, SilverCap, SIMDAD, SiMic, SIMID, SineFormer, SIOV, SIP5D, SIP5K, TFAP, ThermoFuse, WindCap are **trademarks registered or pending** in Europe and in other countries. Further information will be found on the Internet at [www.epcos.com/trademarks](http://www.epcos.com/trademarks).
